1	LOCAL STORAGE OF PROGRAMS
2	ABSTRACT OF THE DISCLOSURE
3	The invention relates to delivering a program to an individual business or
4	residence. In one embodiment, a process for distributing a program sent by a content
5	distributor to a user location is described. A command from the content distributor is
6	received and processed that requests storage of the program at the user location. The user
7	location receives the program and stores the program. The storing is performed in
8	response to at least the processing of the command. A user action related to the program
9	is detected after storage of the program.
